360° Approach to Brachial Plexus Surgery for Neurosurgeons

ISPNS along with the Department of Neurosurgery, Trauma Center, AIIMS, New Delhi is conducting the Brachial Plexus & Peripheral Nerve Surgery (BP & PNS) Cadaveric Workshop on 23th and 24th September 2025 at Jai Prakash Narayan Apex Trauma Center, AIIMS, New Delhi.

After a successful workshop last year, we present to you its second iteration. It will include didactic lectures and cadaveric demonstrations on not only routine brachial plexus surgeries but also secondary procedures and other peripheral nerve procedures to make the candidates confident in their practice, thereby a 360 approach to BP & PNS.

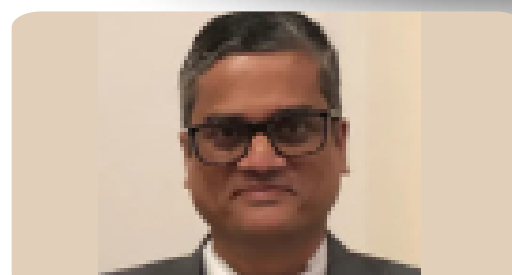

We are fortunate to have a star-studded lineup of expert faculty who will be demonstrating the procedures on cadavers and will be available to guide the delegates during the hands-on session. Symposium and case-based scenarios will be discussed for better understanding and promoting healthy interaction among the delegates.

We welcome you to Delhi, the capital city of India for a never before academic feast and look forward to meeting you in Brachial Plexus Surgery and Beyond- 2nd Cadaveric Workshop at AIIMS, Delhi.
